

Customized CNC Milling Parts with $\pm 0.01\text{mm}$ Tolerance

Our Product Introduction

For more products please visit us on precision-cncparts.com

Basic Information

- Place of Origin: guangdonghuizhou
- Brand Name: ywy
- Model Number: ywy123
- Minimum Order Quantity: 1 Perch/Perches
- Price: USD 3.88-32.88 1 Perch/Perches
- Packaging Details: Carton packaging and blister box
- Delivery Time: 10-15work days
- Payment Terms: L/C D/A D/P T/T Western Union MoneyGram
- Supply Ability: 1000 Perch/Perches 10-15work days

Product Specification

- Coating: Powder Coating, Zinc Plating, Etc.
- Application: Industrial, Automotive, Etc.
- Processing Method: CNC Milling
- Material: Aluminum, Steel, Stainless Steel, Etc.
- Surface Finish: Polishing, Anodizing, Plating, Etc.
- Size: Customized
- Service: OEM/ODM
- Packaging: Carton, Wooden Case, Etc.
- Highlight: **0.01mm CNC Milling Parts,**
ODM CNC Milling Parts

Product Description

Product Description:

CNC Milling Parts are computer programmed machining parts that are created through a process of numerically controlled machining. This process of machining involves the use of a CNC milling machine to accurately cut and shape a variety of materials, creating parts with high precision. We provide a wide range of CNC Milling Parts with lead time of 7-15 days. The parts are packaged with carton, wooden case, etc. to ensure complete safety and protection during transport. Our CNC Milling Parts are highly sought after for their superior quality and accurate design which is achieved through the use of advanced CNC milling machines.

Features:

Product Name: CNC Milling Parts

Material: Aluminum, Steel, Stainless Steel, Etc.

Equipment: CNC Milling Machine

Service: OEM/ODM

Tolerance: $\pm 0.01\text{mm}$

Processing Method: CNC Milling

Highlights: Numerically Controlled Milling Parts, High-Precision Machined Parts, Computer Programmed Machining Parts

Technical Parameters:

Parameters	Value
Coating	Powder Coating, Zinc Plating, Etc.
Processing Method	CNC Milling
Service	OEM/ODM
Equipment	CNC Milling Machine
Precision	High Precision
Application	Industrial, Automotive, Etc.
Lead Time	7-15 Days
Tolerance	$\pm 0.01\text{mm}$
Surface Finish	Polishing, Anodizing, Plating, Etc.
Size	Customized
Processing	Computer Programmed Machining Parts, Numerically Controlled Machining Parts, High-Precision Machined Parts

Applications:

CNC Milling Parts Application and Scene

The YWY CNC101 CNC Milling Parts are widely used in many industries, including industrial, automotive, aerospace, and more. The parts' surface finish can be customized to meet specific requirements, including polishing, anodizing, plating, and other means. The parts are made from a variety of materials, such as aluminum, steel, stainless steel, and other metals. With the help of computer programming and numerical control technology, all surface treatments can be accurately and precisely machined and finished. It is a cost-effective way to make high-quality parts with excellent accuracy and precision.

CNC Milling Parts are used to make parts with complex shapes and geometries. It is a subtractive manufacturing process, which is ideal for creating parts with intricate details, such as gears, sprockets, and other components. The parts can also be coated with powder coating, zinc plating, and other finishes for added durability and protection. Thanks to its accuracy and repeatability, CNC Milling Parts are a popular choice for industries that require precision and accuracy in their products.

Computer Programmed Machining Parts, Computer Numerical Control Machining Parts, and Computer Aided Machining Parts are all terms used to describe CNC Milling Parts. All three processes are used for producing parts with high accuracy and precision. Computer Programmed Machining Parts are created by writing a program that is used to control the CNC machine. Computer Numerical Control Machining Parts are created by manually entering the numerical control commands into the CNC machine. Computer Aided Machining Parts are created by using CAD/CAM software to create a 3D model of the part which is then used to control the CNC machine.

Customization:

Customized CNC Milling Parts from Ywy

Brand Name: Ywy

Model Number: CNC101

Place of Origin: Guangdong, Huizhou

Processing Method: CNC Milling

Size: Customized

Equipment: CNC Milling Machine

Surface Finish: Polishing, Anodizing, Plating, etc.

Tolerance: $\pm 0.01\text{mm}$

Ywy provides custom Computer Numerical Control Machining Parts, Precision Milling Parts and Numerically Controlled Machining Parts with superior quality and precision. Our CNC Milling Parts are manufactured with strict quality control, and can meet your most stringent specifications.

Support and Services:

We provide technical support and service for CNC Milling Parts. Our services include:

Providing technical advice and guidance for CNC Milling Parts

Troubleshooting and diagnosing CNC Milling Parts issues

Repairing and replacing CNC Milling Parts components

Upgrading and optimizing CNC Milling Parts performance

Producing custom CNC Milling Parts as needed

Huizhou City Yuan Wenyu Precision Parts Co., Ltd.
